Larco Introduces Innovative Touchless Sensing Solution

U-WAV™ sensing switch provides customers with unmatched versatility and functionality

Brainerd, Minn. – March 20, 2008 – Addressing the industry need for a versatile touch free sensing solution, [Larco Manufacturing](#), a leading supplier of automatic door mats, handicap wall switches and industrial safety mats, has introduced the U-WAV™ to its product offering.

Designed for touchless activation of automatic doors, lighting controls, or call points, the U-WAV sensor switch is ideally suited for sterile environments, such as operating rooms or clean rooms, where a complete hygienic solution is required.

“Customers in the industries we serve are looking for innovative technologies that can be applied to solve common problems,” said Varuni Novick, president of Larco Manufacturing. “At Larco, our product designers are on the forefront of meeting this demand. While we recognize that environments rarely have the same requirements, products such as the U-WAV will satisfy a vast majority.”

Incorporating durable ABS plastic and advanced circuitry, the U-WAV provides reliable operation as well as adjustable functionality necessary to meet a wide range of operator and application requirements. Key features built into the switch design include:

- Programmable hold time of less than a second (.5) and up to ten seconds;
- Variable detection range — from 4-to-20 inches — depending on application need; and
- Operation in either a switch or sense mode for added flexibility.

Easy to install, the U-WAV sensing switch can be flush or surface mounted depending on the installation requirements and has received CE and FCC approval. The switch comes standard with a universal wall plate designed to fit most North American and European standard box sizes.

Available immediately, the U-WAV Touch Free Sensing Switch is offered in a standard gray finish. It also is customizable to meet décor or branding requirements, and can be ordered in a variety of colors or with logos and face decals.
